

Company History

Tracing its origins to the era of sailboat trade in 1948, the founder, Mr. Wu Tsung-Ming, navigated the bustling east and west shores of Keelung Port in Taiwan. Having witnessed the ebbs and flows of the inspection brokerage industry, he established Sang Shing Inspection & Quarantine Co., Ltd. in 1976, seizing the opportunities of the time.

With the advancement of Taiwan's economy and the government's progressive policies, Sang Shing has upheld its commitment to integrity and professionalism. Despite economic challenges, the company has never wavered in its dedication to excellence. Leveraging decades of hands-on experience, Sang Shing has earned repeated recognition from the government and has been invited to serve as an industry representative in shaping administrative policies. Above all, the company places the highest priority on enhancing the expertise and qualifications of its staff, viewing this as the cornerstone of its operations.

Milestones

- **1976:** Sang Shing was established, providing import and export inspection services in the Keelung and Taoyuan regions.
- **1990:** Initiated digital transformation by implementing system informatization and establishing digital hardware infrastructure.
